# Survey Notes

These results are from a Saint Anselm College Survey Center poll based on online surveys of 2104 New Hampshire likely voters. Surveys were collected between October 1<sup>st</sup> and 2<sup>nd</sup>, 2024, from cell phone users randomly drawn from a sample of registered voters reflecting the demographic and partisan characteristics of the voting population. Names were presented in random order for the favorability and ballot tests. The survey has an overall margin of sampling error of +/- 2.1% with a confidence interval of 95%; the margin of sampling error for questions specific to the 1<sup>st</sup> and 2<sup>nd</sup> Congressional Districts is +/- 3.0% and +/- 3.1% respectively. The data are weighted for age, gender, geography, and education based on a voter demographic model derived from historical voting patterns, but are not weighted by party registration or party identification.

The Saint Anselm College Survey Center (SACSC) was founded in the wake of the 2016 election, and launched its first poll in February 2018 as the midterm elections were getting underway. Housed within the New Hampshire Institute of Politics at Saint Anselm College, the Center conducts quarterly polls of New Hampshire voter attitudes and additional polls as circumstances warrant. This research supports the academic mission of the College, and provides students with a practical education in survey techniques while providing the public at large with insight into political opinion trends that impact the state's federal and gubernatorial elections. To support its operations, the Center performs commissioned research on behalf of nonprofit organizations and corporations.
