

SAINT ANSELM COLLEGE SURVEY CENTER SEPTEMBER 2019 POLL DEMOCRATIC PRESIDENTIAL PRIMARY TOPLINE SUMMARY

These results are from the Saint Anselm College Survey Center poll based on interviews with 423 New Hampshire registered voters expressing an intention to vote in the upcoming Democratic Presidential Primary. Interviews were conducted by landline and cellular phone between September 25th and 29th, 2019. The survey has a margin of sampling error of +/- 4.8% with a confidence interval of 95%. Data are weighted for age, gender and geography based on a voter demographic model derived from historical voting patterns, but are not weighted by party registration or party identification.

New Hampshire Institute of Politics Executive Director Neil Levesque summarized the results, saying, “With campaign season in full swing, the Saint Anselm College Survey Center’s fall poll of the New Hampshire Democratic Primary field shows Elizabeth Warren building on her momentum from the summer, while Kamala Harris and Andrew Yang have been unable to hold onto their July debate bounce. Warren now leads the Democratic field, with 25% of respondents indicating that they would vote for her if the primary election were held today. Joe Biden has seen his support increase somewhat, and is close behind with 24%. Bernie Sanders and Pete Buttigieg are a distant 3rd and 4th, with 11% and 10% support respectively. Harris leads the rest of the field with 5%.

“There is still some fluidity in this race, as 65% of Warren supporters, 72% of Biden supporters, 56% of Sanders supporters, and 73% of Buttigieg voters indicate that they expect that their choice could change between now and the primary election. Among voters who are not firm in their choice, Warren is the 2nd choice of 26%, well ahead of Biden with 12%, Buttigieg with 11%, Sanders with 7% and Harris with 7%. This suggests that when the field begins to winnow down, Warren may in the best position to pick up other candidates’ support. However, if this turns into a two-person race, the nomination may ultimately turn on what sort of candidate Democrats want to send against Donald Trump: one that they believe would make the best president, or one that they believe has the best chance of beating him. If the former, Warren has a clear 27% to 19% advantage over Biden on the question of whom respondents think would make the best President. However, Biden is seen as the strongest nominee against Trump by 37% of voters compared to Warren with 26%. As in our April poll, Warren leads Biden among ‘extremely interested’ and ‘very liberal’ voters, at 28% - 24% and 35% - 11% respectively.

“There remain several months before New Hampshire Democrats cast their primary ballots, but Warren and Biden have clearly separated themselves from the rest of the field. If the dynamic of Warren as the candidate that best expresses Democratic voters’ policy preferences and Biden as the one who has the best chance of beating Trump sets in with voters, this is likely turning into a two-person race absent a big shake-up.”

DEMOCRATIC PRIMARY BALLOT
